_RELENTLESS

In our world-class facilities, we manufacture the finest firearms, ammunition, electro-optics, suppressors and Advanced Sport Pellet (ASP) airguns, while also offering the highest quality firearms and tactics training at our SIG SAUER Academy®. We do this because we share a relentless drive to develop the finest products, a love of freedom, the same unwillingness to compromise and the same pride in our country as those who choose the SIG brand. Regardless of whether a SIG product will be used by a soldier, a law enforcement officer, or a private citizen, it receives the same rigorous quality control to ensure that it will perform when it matters most.

THE EVOLUTION OF SIG SAUER®

When business entrepreneurs, Friedrich Peyer im Hof, Heinrich Moser, and Conrad Neher opened a wagon factory near the Rhine Falls in Switzerland in 1853, they had no idea that their humble wagon factory would later become known as an international leader in the small arms industry. In response to a challenge from Switzerland's Federal Ministry of Defense, the Swiss Wagon Factory entered a competition to develop a state-of-the-art rifle, in hopes that the Swiss Army would adopt it. Four years later, they found themselves facing an order for 30,000 of the rifles, changing the name of the company to the Swiss Industrial Company. In German, the name was Schweizerische Industrie-Gesellschaft, later shortened to SIG.

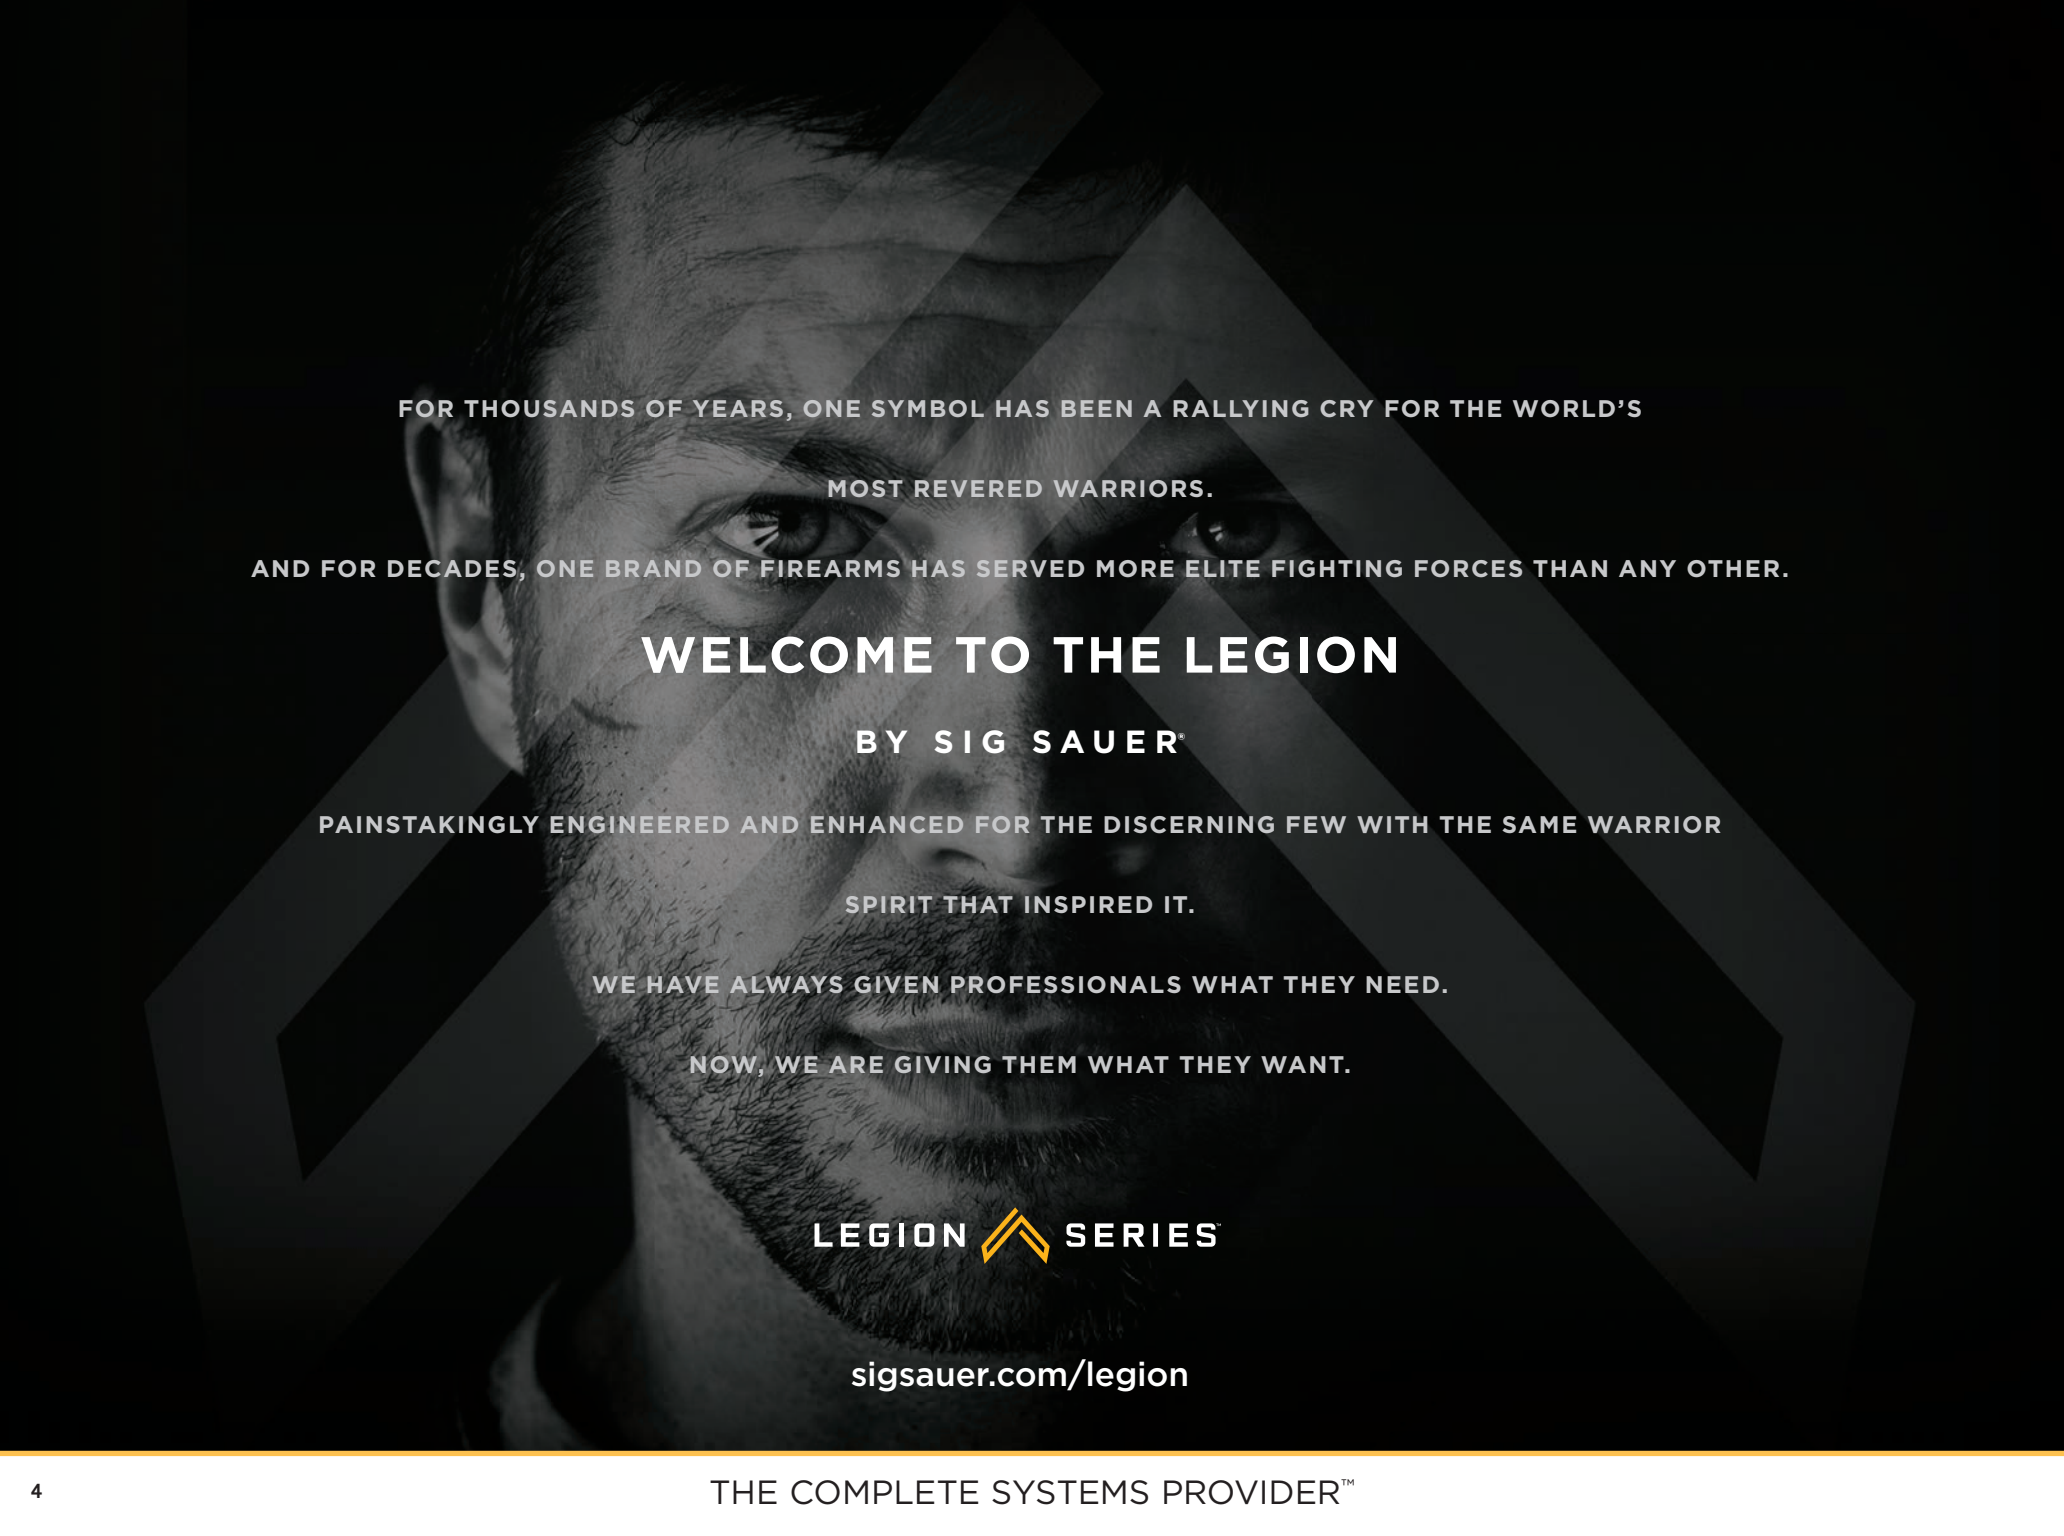

In the 1970's, SIG's small arms division expanded to include Hämmerli Target Arms from Lenzburg, Switzerland, and J.P. Sauer & Sohn, GmbH, of Eckernförde, West Germany, known worldwide for their hunting rifles. In the 1980's, SIG set its sights on the United States of America. With a rich history of German and Swiss influence, the company opened its first American location in Tysons Corner, Virginia, under the name SIGARMS. Two years later, the firearms manufacturer relocated to a larger location in Virginia where the company's classic handguns (P220®/P230/P225®/P226®) were imported and assembled. SIGARMS enlarged its footprint on American soil in 1990 by opening new manufacturing facilities in Exeter, New Hampshire. In 2005, SIGARMS changed its name to SIG SAUER, Inc. and continued to expand its market share in the firearms industry.

In 2014, SIG SAUER invested more than \$18 million to develop a new corporate headquarters at Pease International Tradeport in Newington, N.H. Encompassing 206,000 square feet, the leading edge manufacturing plant includes quality control testing facilities, a multi-position test-fire range, and a modern workspace designed from the ground up for efficiency. Today, SIG SAUER serves as the second largest employer in the state and is widely recognized as the fastest growing firearms manufacturer in the United States.

Pioneering designs and state-of-the-art manufacturing capabilities are the hallmarks of the company's past successes, providing the foundation for future growth. SIG SAUER has recently expanded its product line, now offering Elite Performance ammunition, electro-optics, suppressors, and Advanced Sport Pellet (ASP) airguns, earning the company a unique reputation as The Complete Systems Provider™. This total package approach sets SIG apart from other firearms manufacturers, as its diverse and innovative product line and complementary training programs are unmatched in the firearms industry.

SIG SAUER remains committed to hiring the foremost industry experts in all product categories to ensure that all new products live up to the SIG SAUER® name. When it is "MADE BY SIG™", it boasts the same exacting standards of quality, reliability, and performance that have made SIG SAUER the brand of choice for many of the most elite military, government, and law enforcement units across the globe.

FOR THOUSANDS OF YEARS, ONE SYMBOL HAS BEEN A RALLYING CRY FOR THE WORLD'S

MOST REVERED WARRIORS.

AND FOR DECADES, ONE BRAND OF FIREARMS HAS SERVED MORE ELITE FIGHTING FORCES THAN ANY OTHER.

WELCOME TO THE LEGION

BY SIG SAUER®

PAINSTAKINGLY ENGINEERED AND ENHANCED FOR THE DISCERNING FEW WITH THE SAME WARRIOR

SPIRIT THAT INSPIRED IT.

WE HAVE ALWAYS GIVEN PROFESSIONALS WHAT THEY NEED.

NOW, WE ARE GIVING THEM WHAT THEY WANT.

LEGION  SERIES

sigsauer.com/legion

UNLEASH THE WARRIOR SPIRIT.

The SIG P220®, P226® and P229®; three of the most highly regarded firearms in the professional community, are receiving a series of enhancements based on the needs and wants of elite users. For those who demand the best, we now have something even better.

LEGION ENHANCEMENTS

- 1 Legion Gray Finish**
Enhances durability & lubricity
- 2 Solid Steel Guide Rod**
Reduces muzzle flip
- 3 Checkering Under Trigger Guard**
Minimizes lateral movement
- 4 X5 Undercut**
Accommodates high grip techniques
- 5 Grayguns Inc. Designed Trigger**
Adjustable for over travel
- 6 Reduced Profile Controls**
Prevents premature activation of slide stop, with improved texture for better control
- 7 Three Magazines**
Delivers more value
- 8 Elite Beavertail Reduction**
Reduces printing when concealed
- 9 Enhanced Polished Action with SRT**
Smoother DA trigger press that enables faster follow-up shots
- 10 Reduced Decocker**
Slimmed down and knurled decocker for ease of use
- 11 Custom G10 Grips**
Provides enhanced control for high grip techniques
- 12 X RAY3™ Sights**
Optimizes sight acquisition in all lighting conditions
- 13 Enhanced Front Strap Checkering**
Provides a more secure grip which provides better control

- › Highest Rated (Passive) Hearing Protector Available
- › External Microphones for "Talk-Thru" Capability

PISTOLS

Choose from a full array of sizes, triggers, calibers, finishes, and features—all with unfailing SIG reliability and accuracy.

**INSPIRED BY THE ELITE PROFESSIONAL.
CARRIED BY ALL WHO DEMAND THE BEST.**

A handgun is a handgun. Unless it's a SIG. Engineered to perform anywhere, at any time, and under any circumstance, SIG pistols boast unique, advanced features that stand out among the rest. Key features include:

SIGLITE® Night Sights

Integral Accessory Rail

4-Point Safety System

Nitron® Stainless Steel Slide

SAS® (SIG ANTI-SNAG)

Threaded Barrels

SRT™ (Short Reset Trigger)

Front Cocking Serrations

SIZING UP YOUR SITUATION

You want a pistol with frame dimensions directly suited to your needs. Whether you'll be sliding your handgun into a range bag or concealing it in a purse, shooting competitively or defending your home, SIG SAUER® offers a pistol for every shooter and scenario.

FULL-SIZE

When shootability and sighted accuracy are a must. Generous dimensions and even weight distribution help to deliver a more accurate sight picture and reduced felt recoil.

Barrel > 4" Frame > 7.5 x 5.5"

CARRY

A balance of shootability with concealment. A full-size grip allows the shooter more control while reduced slide length allows for lighter carry.

Barrel ≈ 3.9" Frame 7 x 5.5"

COMPACT

If concealment is an essential requirement, the reduced slide length and grip height enable easy concealment and carry with ergonomics designed to promote point-and-shoot accuracy.

Barrel < 4" Frame ≈ 7 x 5"

SUBCOMPACT

For the next level of concealment, SIG's subcompact handguns feature even shorter slide length and grip height.

Barrel ≈ 3.5" Frame < 7 x 5"

MICRO-COMPACT

Often called "pocket pistols," the SIG micro-compacts deliver the ultimate in concealment. Discreet, lightweight, and able to fit almost anywhere.

Barrel < 3" Frame < 6 x 4"

TRIGGER TIME

Any expert will tell you, it's the trigger that ultimately puts rounds on target. Weigh the pros and cons of each trigger carefully to select the one you can fire most accurately and carry most confidently.

STRIKER-FIRED TRIGGER

STR | Short Tactile Reset

Once fired the pistol resets quickly with a tactile feel, offering less time between shots.

HAMMER-FIRED TRIGGERS

DA/SA | Double-Action/Single-Action

The first trigger pull performs the double-action of cocking the hammer and then releasing the sear. Followed by lighter, single action trigger pulls on all subsequent shots. The heavier first trigger pull acts to reduce inadvertent discharges.

SAO | Single-Action-Only

The trigger performs the single-action of releasing the hammer with a consistent trigger pull that is generally regarded as the shortest, lightest, and smoothest available. The slide can still be actuated with the safety engaged (a SIG exclusive). All models feature a manual thumb safety.

DAO | Double-Action-Only

Every trigger pull performs two actions: first, cocking the hammer, and second, releasing the sear. The pistol remains decocked after each shot and does not require an external safety.

THE CALIBER DEBATE

Popular opinions vary widely. Only you can select the best caliber for you. In addition to the right combination of bullet weight and velocity, think about your desired magazine capacity, plus ammunition cost and availability.

10MM

Offers higher velocity, greater range and more kinetic energy than the .45A&W.

.45A&W

Known for a combination of power and controlled penetration, due to a large diameter bullet and moderate velocities.

.40S&W

Designed to match the performance of the FBI's reduced-velocity 10mm in a smaller cartridge size while offering an energy advantage over the 9mm.

.357SIG

Developed in 1994 to duplicate the performance of a 125 gr .357 Magnum cartridge, it combines relatively high velocity with remarkably flat trajectory.

9MM

Regarded as the world's most popular and widely used handgun cartridge. It combines a flat trajectory with relatively low felt recoil.

.380ACP

Compact and light design make it popular in handguns designed for concealed carry. Less powerful than larger calibers minimizing recoil and improving controllability.

.22LR

Among the lightest and most affordable rounds in handguns, the .22LR is ideal for target shooting and training.

PISTOL GUIDE

SIG SAUER® pistols can be grouped into three family categories; Classics, Polymer and 1911-style.

CLASSICS

All-metal durability, DA/SA trigger, plus a 4-Point Safety System including decocking lever, safety intercept notch, trigger bar disconnect and patented automatic firing pin safety block.

(SAO available in select models)

POLYMER

Proven SIG engineering in hard-use polymer, this series offers options in size, caliber, and trigger system.

1911-STYLE

The crisp SAO trigger system and styling of the 1911, enhanced by SIG engineering and all-metal durability.

SIGSAUER **M17**

THE COMPLETE SYSTEMS PROVIDER™

THE CHOSEN ONE

BASED ON THE P320®, THE M17 IS THE U.S. ARMY'S CHOICE FOR TODAY AND TOMORROW.

After one of the most rigorous and highly competitive reviews in the history of military firearms, SIG SAUER Inc. was awarded the Modular Handgun System contract with a P320-based platform, the new U.S. Army M17. This award makes it the U.S. Army's first replacement sidearm in over 30 years. The Army selected the P320 based platform because of its uniquely innovative modularity, uncompromising performance and unmatched capability.

The U.S. Army's selection of the M17 officially cements the P320's place in the historical record of the world's truly influential weapons as it enters service with America's current and future armed forces across the globe in the defense of freedom.

Based on the M17
firearm selected by
the U.S. ARMY

P320[®]

MODULAR HANDGUN SYSTEM

Unprecedented modularity with a clean crisp trigger and short reset, flexibility in caliber and frame size, and a safe takedown system. Available in three grip sizes for the perfect fit.

CUSTOM SHOP

Expert Skills, Maintenance and Performance Testing

The SIG SAUER® Custom Shop offers a wide range of services to keep your SIG SAUER pistol in peak operating condition. Services include refurbishing, action jobs, sight replacement and service programs that won't void your warranty. With years of experience and a detailed understanding of the SIG product line, our gunsmiths can bring your pistol back to top performance and appearance using only original factory parts and finishes.

CUSTOM SERVICES

ACTION ENHANCEMENT PACKAGE

- Hone and polish critical surfaces to lighten and smooth both the double-action and single-action trigger pulls
- Includes Feed Ramp Polish
- Excludes SP2009, SP2340, SP2022*, 226X5/X6, Mosquito, 1911-22, P210*, P220* SAO, P226* SAO, P232*/230*, P238*, P938*, P250*, P290* and DAK models

ACTION ENHANCEMENT PACKAGE FOR 226X5 AR (ALL AROUND)

- Hone and polish critical surfaces to lighten and smooth both the double-action and single-action trigger pulls
- Includes Feed Ramp Polish
- For the 226X5 All Around model only, not available for any of the other X5 or X6 models

SHORT RESET TRIGGER PACKAGE

- Retrofit your P220, P224*, P225*, P226, P227*, P228*, P229*, P239* and P245™ with sear and safety lever parts
- Reduces the trigger reset travel by about 60%
- Perfect for both competition and combat shooters who want to reduce their follow-up shot times
- Price includes parts and labor
- Original parts returned with your firearm

FULL SERVICE PACKAGE

- Detailed stripping and complete and thorough cleaning of the entire pistol
- Professional safety inspection of critical components by factory certified personnel
- Replacement of springs prone to wear (trigger bar spring, slide catch lever spring, recoil spring) and any needed small parts
- Lubrication to factory standards, reassembly and function testing.
- Not available for 1911-22 or Mosquito models

For more information on Custom Shop services, or instructions to send in your pistol for service, call the SIG SAUER Customer Service Department: (603) 610-3000, option 1. Please have your pistol's serial number on-hand. All firearms shipped to SIG SAUER must have a Return Material Authorization (RMA) number or they will be refused and returned to the sender.

A full-page background image of a soldier in camouflage tactical gear holding a SIG rifle. The soldier is wearing a tactical vest with pouches and has a knife sheathed on their leg. The rifle is a black assault rifle with a magazine that has the number '8' on it. The background is a blurred outdoor field.

RIFLES

While others may settle, SIG uses world-class engineering to elevate and redefine every aspect of the rifle performance, delivering unmatched reliability and precision.

CARBINE

A firearm with a 16" or longer barrel.

SHORT BARREL

A firearm with a barrel length under 16" subject to NFA tax.

PISTOL

A firearm with a barrel length under 16" not subject to NFA tax.

MCX VIRTUS

**CONCEIVED FOR THE DEMANDS OF
SPECIAL OPERATION UNITS**

THE FIRST TRUE MISSION-ADAPTABLE WEAPONS SYSTEM, USED BY THE MOST ELITE MILITARY UNITS IN THE WORLD.

Your mission awaits. The next level in modularity and performance is here. Configurable in more than 500 combinations, the ground-breaking and modular SIG MCX® VIRTUS is ready for any mission. Engineered for unmatched reliability, the MCX VIRTUS is designed to perform beyond 20,000 rounds without the need for replacement parts.

To enhance accuracy, the MCX VIRTUS features the new SIG MATCHLITE™ Duo trigger for crisp, clean feel. Free-Float M-LOK® handguards are available in four lengths. Ambidextrous, AR-style controls and a folding and collapsing stock enable the MCX VIRTUS Patrol to be tailored to any shooter. Available in Stealth Gray and FDE and built with the highest-quality components, the MCX VIRTUS is the apex predator of the carbine world.

AMMUNITION

MADE BY SIG SAUER®

ELITE PERFORMANCE AMMUNITION

SIG Elite Performance Ammunition delivers a higher standard of maximized reliability and accuracy across every caliber. Each round has undergone exhaustive testing to ensure consistent weight retention, energy transfer and controlled expansion.

FMJ

FULL METAL JACKET

Engineered to match SIG V-Crown® ballistics for a more seamless transition from practice to carry ammunition, SIG Full Metal Jacket Ammunition delivers round after round of affordable, premium-level performance. Featuring dependable primers and the same exceptional, clean-burning propellants used in the breakthrough defense rounds, SIG Full Metal Jacket delivers equivalent point-of-impact, recoil and energy. Practice or competition, SIG Full Metal Jacket measures up.

- › Ballistically Matched to SIG V-Crown
- › Affordable Practice
- › Premium Performance

V-CROWN[®]

JACKETED HOLLOW POINTS

Innovative SIG V-Crown cartridges utilize proven engineering design features, from low-flash propellant to a cannellure shank, resulting in maximum weight retention with reliable terminal ballistic performance.

- › Consistent Penetration
- › Uniform Controlled Expansion
- › Maximum Weight Retention

SIG V-Crown defensive rounds combine perfected material specifications and fine-tuned design innovations. Featuring a stacked hollow point cavity, to deliver exceptional on-target energy with maximum weight retention and optimal expansion – the ultimate in stopping power.

Certain V-Crown Loads are optimized for maximum terminal ballistic performance in small-frame firearms. (Identified with *)

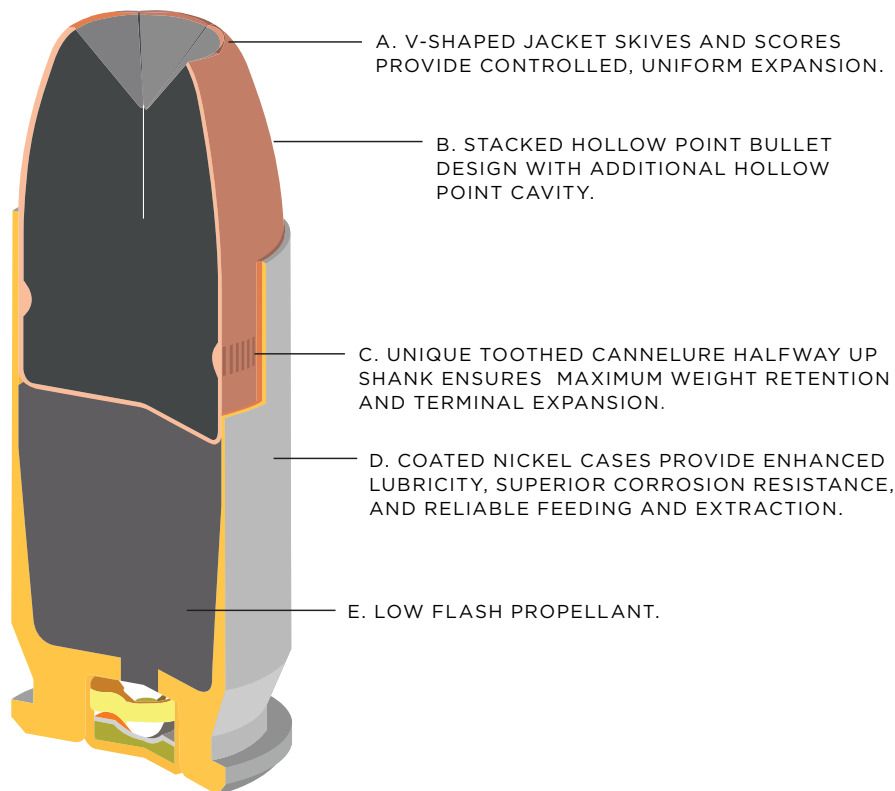

CONTROLLED UNIFORM EXPANSION

CONSISTENT BALLISTIC PERFORMANCE

MAXIMUM WEIGHT RETENTION

MATCH

PRECISION MATCH GRADE

SIG Match Grade rifle rounds are engineered to excel in today's precision auto-loading platforms as well as bolt-action rifles. Utilizing optimized shell case metallurgy and premium primers each round is precision-loaded using state-of-the-art, electromechanical monitoring for geometric conformity and all are 100% inspected.

- › Minimal Velocity Variation
- › Precision-Loaded for Conformity
- › Renowned Sierra MatchKing® Projectiles
- › Temperature-Stable Propellants

SIG 300 BLK SUBSONIC

SIG propellant chemistry has been optimized to produce the ideal amount of down-bore pressure for cycling both piston and gas-driven platforms, with or without sound suppression. SIG 300BLK Subsonic rounds minimize recoil, sound and muzzle flash, while maximizing the number of hits on target.

SIG 300 BLK SUPERSONIC

The ultimate round for precision shots at extended range, SIG 300BLK Supersonic features Sierra MatchKing® projectiles in a pointed meplat design for maximum velocity retention - yielding flatter trajectories and more on-target energy.

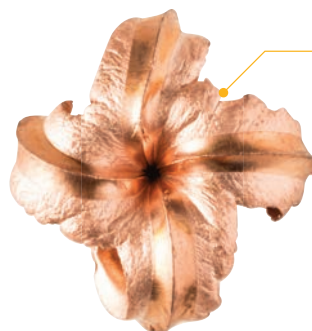

SIG HT™

HUNTING

SIG HT all copper superior hunting rounds yield consistent 1.8X diameter expansion using premium-quality powders and primers for minimum velocity variation. Perfected for AR style rifle feeding, optimized nose geometry combined with premium nickel-plated shell casings delivering consistently reliable accuracy for taking down game.

- › California lead-free in compliance with California Fish and Game Code Section 3004.5
- › Consistent 1.8X Diameter Expansion
- › Minimal Velocity Variation
- › Lead-Free Projectile
- › AR-Style Rifle Feeding

CONSISTENT 1.8X DIAMETER EXPANSION

AR-STYLE FEEDING

LEAD FREE PROJECTILE

The 60gr 223 Rem bullet has a muzzle velocity of 3,100 fps and muzzle energy of 1,280 ft-lbs, making it an effective, hard-hitting round.

223 REM
60grain

The 150gr 308 Win features a muzzle velocity of 2,900 fps and muzzle energy of 2,801 ft-lbs. This SIG HT 308 Win cartridge is excellent for mid-sized game including deer, antelope, hogs and predators.

308 WIN
150grain

The 165gr 300 Win Mag features a muzzle velocity of 3,110 fps and muzzle energy of 3,543 ft-lbs. This SIG HT cartridge is excellent for large game including elk, mule deer, and bear.

300 WIN MAG
165grain

The 120gr 300 BLK bullet has a muzzle velocity of 2,250 fps and muzzle energy of 1,349 ft-lbs making it an effective, hard-hitting hog round, including mid-sized game.

300 BLK
120grain

VP

VARMINT & PREDATOR

SIG SAUER Varmint & Predator rounds utilize yellow tipped projectiles designed specifically for explosive expansion and unmatched accuracy. All loads feature projectiles that are light for their caliber (40 grains for the 22 caliber, 55 grains for 6mm), yielding higher muzzle velocities and flatter trajectories across all practical hunting distances. The Varmint and Predator rounds contain the same high quality single base extruded powders as SIG Match Grade rounds. This ensures consistent round-to-round muzzle velocities and insensitivity to temperature change. All SIG SAUER Varmint & Predator rounds are produced on state-of-the-art loading equipment with electromechanical monitoring for charge weight consistency and geometric conformity.

- › Match Grade Accuracy
- › Flat Trajectories
- › Explosive Fragmentation on Small Game

ELECTRO-OPTICS

SEE THE DIFFERENCE

SIG SAUER® Electro-Optics fuses together advanced electronic technologies, superior, high-definition glass, and military-inspired designs to achieve maximum clarity, accuracy, and performance shot after shot.

We have developed truly game-changing optics for all types of shooters: military, law enforcement, hunters, and competitive shooters.

Learn more about the complete Electro-Optics line at sigauer.com/electro-optics

THE COMPLETE SYSTEMS PROVIDER™

SBT® SIG Ballistic Turret

- › A Custom, Laser-Etched Elevation Dial on Most SIG SAUER® TANGO® and WHISKEY® Riflescopes
- › Matched to the Ballistics of the Shooter's System at no Extra Cost
- › Inputs Bullet Specifications, Ballistic Coefficient, Muzzle Velocity, Elevation, and Other Environmental Factors
- › Allows for Correct Bullet Drop Compensation and Pinpoint Accuracy at Any Range

FREE CUSTOM SBT DIAL

ON ALL TANGO AND MOST WHISKEY RIFLESCOPES

LOCKDOWN® Zero System

- › Zero Stop-Locking Turret Allows a Rapid Return to Zero and Locks at Zero
- › Eliminates Concern About How Far to Turn the Elevation Dial to Return to Zero

STEALTH ID™

- › Deflection Armor Trapezoidal Surfacing Breaks Up the Shape and Visibility of the Optic
- › Slide Serrations and Grip Checkering Add Function to the Form of All SIG SAUER Electro-Optics

HELLFIRE® Reticle

- › Electronically Illuminated Utilizing an Advanced Fiber-Optic Technology
- › Varies the Light Intensity of the Central Aiming Point From IR (InfraRed) Dim to HellFire Bright for Daylight Illumination
- › Results In a Bright, Defined Aiming Point for Precision Shot placement in any condition

LEVELPLEX™ Anti-Cant System

- › Utilizes an Integrated Digital Level that is Accurate to +/- 0.5° or +/- 1 Degree. Available in any WHISKEY5 or TANGO6 with side focus.

MEGAVIEW™

- › Provides Massive Field of View (FOV), Allowing Faster Target Acquisition
- › Enhances Awareness of Objects in the Shooter's Periphery

ALT™ Aspheric Lens Technology

- › Eliminates Aberration, Reduces Weight, and Helps to Focus the Projected Image Through the Lenses
- › Superior Low Distortion Optical Performance

SPECTRACOAT®

- › Highly Efficient, Ultra-Wide Broadband, Anti-Reflection Lens Coatings
- › Reduces Surface Reflections to Extremely Low Levels Across the Entire Visible Spectrum
- › Provides Superior Light Transmission

HDX®

- › Comprises Both High Definition (ED) and High Transmittance (HT) Glass
- › Ultra-High Resolution, Optical Performance, and Light Transmission

LENSARMOR™

- › Abrasion-Resistant Lens Coatings
- › Extreme Durability Ensures the Lenses on the Scope Will Stay Sharp, Bright, and Clear

LENSHIELD™

- › Mil-Spec Oleophobic Coating
- › Sheds Water, Oil, and Gunk, Ensuring a Clean Sight Image at All Times

MOTAC™ Motion Activated Illumination

- › Motion-Sensing Technology
- › Powers Up Illumination When Sensing Motion, and Powers Down When it Does Not, Extending Battery Life

SOLAR POWERED ILLUMINATION

- › Powered By a Solar Cell
- › Extends Runtime and Improves Daylight Brightness of the Reticle With or Without a Battery

TRUHold™

- › Lockless Zeroing System
- › Utilizes Quad Adjustment Springs Designed and Torture-Tested to Endure Handgun Recoil and Return to Zero Shot After Shot

SOS™ SIG Optic Stabilizer

- › Proprietary SIG Optic Stabilizer System
- › Gyroscopically Stabilized to Cancel Out Unwanted Shaking and Vibrations that Can Blur an Image, Especially at Higher Magnification Levels

AMR™ Angle-Modified Range

- › Ranging Technology Using an On-Board Inclinometer
- › Reads Incline / Decline Angle and Modifies the Effective Ballistic Shooting Range to The Target
- › Equivalent Horizontal Range, Integrating Perfectly When Used with SIG Ballistic Turret Dials

LIGHTWAVE DSP™ Digital Signal Processing

- › Leverages HyperScan, and Advanced Power Management Technique, Providing the Fastest Refresh Rate in Scan Mode (4 times Per Second)
- › Uses the Latest Generation Field Programmable Gate Array (FPGA)
- › reduces false positives while finding weak or distant targets

LUMATIC DISPLAY™

- › Proprietary OLED (Organic Light Emitting Diode) Display™
- › Ambient Light Sensor Continuously Monitors Light Conditions and Adjusts the Display Brightness Accordingly
- › No other Display Offers this Adaptive Ability to Prevent the Shooter's Pupil from Constricting in low-Light Conditions

90° POWERCAM™ MOUNT

- › Quick Flip Away Mount for Fast Transitions from Near to Far Distance Targets
- › No Button Actuator for Rapid Single Handed Operation

TANGO6™

PRECISION TACTICAL RIFLESCOPES

The TANGO6 super-zoom 6X riflescope line has you covered from close quarter battle operations to long range shooting, from 3-Gun competitions to hunting dangerous game, from bolt-actions to MSR's.

RETICLE TURNS OFF

ROMEO6™

FULL-SIZED RED DOT SIGHT

The ROMEO6 Red Dot sight provides the ideal full- sized sighting solution for today's MSR/AR platforms. The solid, lightweight design comprised of CNC 7075 aluminum, will withstand the rigors of harsh environments and conditions. A trusted accessory for law enforcement, US armed forces, and trusted citizens alike.

ROMEO6T™ FULL SIZED RED DOT SIGHT

1x30MM
SOR61031
SOR61032

- › Red LED Illumination System for Daylight Visibility with Extended Runtime
- › Mil-Spec Red Dot Sight
- › MOTAC™ (Motion Activated Illumination) Powers up when it Senses Motion and Powers down when it does not
- › Solar Panel with Twin Super Capacitors that Provide Up to 9 Hours of Battery Free Life (Battery Backup)

ROMEO6H FULL SIZE RED DOT SIGHT

1X30MM
SOR61011, SOR61012

- › Ballistic Circle-Dot and Ballistic Circle Quadplex™ Reticle Options
- › IPX7 Waterproofing

STANDARD FEATURES

- › ROMEO6T Features a Solar Panel with 2 Super Capacitors that Provide up to 9 Hours of Battery Free Life (Battery Backup).
- › Unlimited Eye Relief to Acquire Aiming Point and Target, Regardless of Eye Position Behind Sight
- › 2 MOA Red Dot with 12 Intensity Settings for Rapid Target Acquisition
- › MOTAC (Motion Activated Illumination) Powers Up or Down when Sensing Motion

LIGHTWAVE DSP (Digital Signal Processing) engine leverages HyperScan—an advanced power management technique that provides the fastest refresh rate in scan mode (4 times per second) even at distances over a mile.

LIMA38 P938/P238 LASER

PISTOL LASER
SOL13801

NEW

- › Ideal for Target Shooting, Conceal Carry and Personal Defense
- › Precision engineered to fit SIG P238 and P938 pistols, including rubber grip variants
- › Powered by Lithium 1/3N battery
- › Dual-sided switch supports ambidextrous operation

FITS PERFECTLY WITH SIG SAUER®
P320® AND P250® PLATFORMS

LIMA[®]

LASER SIGHTS

The SIG SAUER® proprietary LIMA320 Laser Grip Module integrates and fits perfectly with our P320® and P250® pistol platforms. LIMA Red or Green Lasers are the most advanced, low profile laser sights on the market and are virtually invisible to the operator. The LIMA38 pistol laser is engineered to fit SIG P238® and P938® pistols, including rubber grip variants.

LIMA320 LASER GRIP

RED/GREEN LASER

SOL51001
SOL51002

- › Integrates and Fits Perfectly with our P320® and P250® Pistol Platforms
- › State-of-the-Art Laser Targeting in a Package That is Stealth and Virtually Invisible to the Operator
- › Same Material as SIG SAUER Standard Polymer Frames and Textured to Match
- › Seamlessly Integrates Either a Red (Oclaro) or Direct Green (Osram) High Quality and High Efficiency Laser Module for Extreme Accuracy
- › Powered by a Bottom Mounted Lithium 1/3N Battery in the Palm Swell
- › Works with Carry, Compact and Full Size

RED OR GREEN LASER

INSTANT ACTIVATION

STANDARD FEATURES

- › Latest Generation 5 mW Red or Green Lasers for Unmatched Runtime
- › Ambidextrous Switches for Easy Finger Actuation
- › Momentary or Continuous On with 5 Minute Auto-Timeout

- › Internal Battery Compartment Access Without Removing the Laser
- › Windage and Elevation adjustments

SIG SAUER® ELECTRO-OPTIC INFINITE GUARANTEE®

- Unlimited Lifetime Guarantee
- Fully Transferable
- No Warranty Card Required
- No Receipt Required
- No Time Limit Applies
- No Charge

ELECTRONIC AND TRITIUM LIMITED 5-YEAR WARRANTY

Covers any defects in materials and workmanship in the electronic and Tritium components of illuminated riflescopes/sights, pistol sights, electronic sights, flashlights, lasers, binoculars, spotting scopes and rangefinders for five years from date of manufacture.

A collection of SIG Sauer suppressors and firearms components arranged on a textured surface. In the upper right, a portion of a SIG Sauer AR-style rifle is visible, featuring a suppressor. Below it, several individual suppressors of various sizes and designs are laid out. To the left, a long, perforated rail or handguard is visible. The background is dark and textured, possibly a carrying case or a tactical surface.

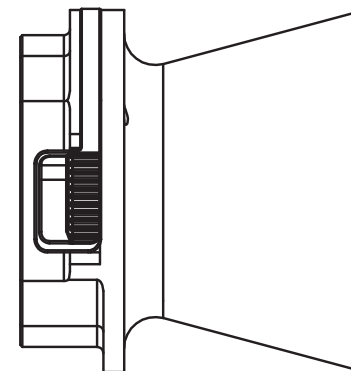

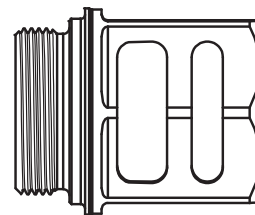

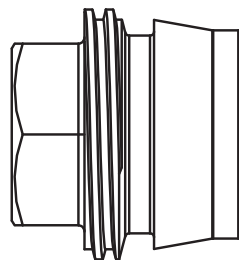

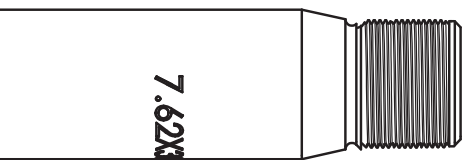

SUPPRESSORS

MADE BY SIG SAUER®

WELCOME TO THE FUTURE OF SILENCE.

With decades of product design and R&D experience under their belts, SIG SAUER® engineers have developed the next generation of suppressors. At SIG, suppressors are not treated as bolt-on accessories. It is understood that they interact with the gas system of the host firearm and can affect accuracy, reliability, back pressure, and other critical factors. Designing firearms, suppressors, and ammunition as a complete, integrated system maximizes overall performance. The end result is the most advanced, most dependable suppressor technology the world has seen, or heard.

THE COMPLETE SYSTEMS PROVIDER™

ALIGNMENT

TAPER-LOK® MOUNT

- › Innovative Tapers Self-Center the Suppressor Bore and Rifle Bore, Greatly Reducing Point-of-Impact Shift and Group Dispersion
- › A Larger Contact Area Maximizes Retention During Repeated Firing, Requiring About 20% More Force to Remove than it did to Install
- › Taper-Lok Mounts are Available in Multiple Thread Pitches and Calibers
- › Backwards-Compatible with Traditional 90-Degree Shouldered Barrels

SUPPRESSOR ACCESSORIES

SUPPRESSOR PISTONS

Pistol suppressor pistons can convert thread pitch or caliber

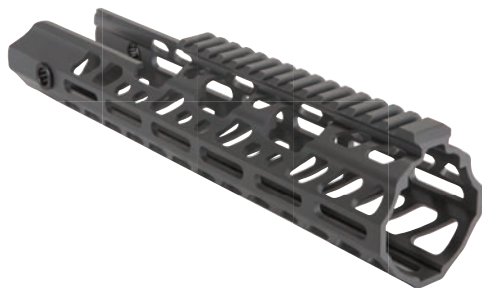

- › Made of 17-4 Heat-Treated Stainless Steel.
- › Available in 9/16-24, M14.5x1 LH, M16x1 LH, M16x1 RH, .578x28, 1/2x28, M13.5x1 LH

RIFLE SD HANDGUARDS

Constructed of Mil-grade aluminum and features a top picatinny rail for sight and optic.

- › Wide Handguard to Accommodate Suppressors
- › Multiple Gas Block Access Ports for Different Length Barrels and Calibers
- › M-LOK® Rails on Sides and Bottom

SUPPRESSOR WRAPS & HEAT MITS

The SIG SAUER® Mirage Cover significantly reduces the effects of suppressor mirage on the shooter's ability to identify and engage a target. Constructed with multi-ply carbon fiber and a repellant outer shell and sewn with Kevlar and Inconel threads.

The SIG SAUER suppressor removal mitt gives shooter's the ability to remove their suppressor safely without causing harm. The mitt is quilted with grey Nomex threads, constructed with a carbon twill front and lined with carbon felt.

MUZZLE BRAKES

Add additional baffle protection from unburnt powder particulates

- › Reduces Felt Recoil
- › Reduces Ground Disturbance
- › User-Replaceable
- › Simple and Fast Timing

FLASH HIDERS

When fired without suppressor

- › Reduces Flash over Brake use
- › User-Replaceable
- › Simple and Fast Timing

TAPER-LOK® MOUNTS

Interchangeable Taper-Lok mounts are compatible with all QD SIG Suppressors

- › Revolutionary Taper-Lok Fast-Attach System Enables Quick and Simple Muzzle Device Installation
- › No More Shims
- › Forward-Thinking Design Optimizes Alignment, Improving Accuracy and Greatly Reducing Point-of-Impact (POI) Shift, even after Multiple Install / Removal Cycles

ADVANCED SPORT PELLET™

MADE BY SIG SAUER®

The most elite name in firearms introduces an entirely new line of advanced pellet-firing platforms with performance up to the exacting standards of SIG SAUER®.

Designed to imitate their counterpart firearm model specs in weight and balance, SIG Advanced Sport Pellet pistols and rifles - together with a full line of accessories and ammunition - deliver more authentic handling for increased, year-round accessibility to practical training.

For 2018, SIG is adding new models for target shooting and expanding the ASP line to include airguns for small game and pest control.

Shoot more. Shoot better. Shoot SIG.

THE COMPLETE SYSTEMS PROVIDER™

TECHNOLOGY

SUPERIOR DESIGN

SIG SAUER® break barrel rifles, air pistols, air rifles and accessories are engineered to elevate airguns to a new standard of performance.

PATENTED BREAK BARREL TECHNOLOGY

ASP MATCHLITE™ TRIGGER

Completely new two-stage adjustable match-grade trigger system that performs better than traditional airgun triggers on the market today. Can be adjusted to one of eight different pull rates – from 2.5 to 4 pounds. The trigger breaks at 4mm regardless of the pull rate selected.

GLIDELITE™ COCKING MECHANISM

Makes it significantly easier to use than other break barrel rifles. Cocks at 33 lbs vs the standard 48 – 52 lb cocking effort found in competitive products in this power range.

PROPRIETARY BREECH-LOCKING SYSTEM

Precisely aligns the barrel to the action, ensuring consistent accuracy.

PATENTED CO₂ TECHNOLOGY

SIG ASP RIFLES

The unparalleled performance of SIG's patented Rapid Pellet Magazine for the MPX and MCX CO₂ rifles smoothly feeds up to 30 rounds in 3.5 seconds. Rifles come standard with one magazine and refillable belt. Accessory RPM (purchased separately) includes three spare belts.

SIG ASP PISTOLS

In line with the RPM magazine for the CO₂ rifles, SIG has introduced the patented Rapid Pellet Magazine for select CO₂ pistols as well. Available in either 20 round or 30 round (depending on model), the belt magazine allows for more trigger time between refills.

SIG ASP CAM LEVER CO₂ LOADING

The innovative cam lever loading system (available on select models) automatically seats and pierces the CO₂ cartridge without the use of any tools.

ASP20

BREAK BARREL AIR RIFLES

Introducing the most advanced break barrel system in the marketplace, engineered and produced by SIG in Newington, New Hampshire. The common misconception among many is that high muzzle velocity makes for a better air rifle. In actuality, foot-pound muzzle energy is a more accurate gauge of the power of air rifles than the speed at which a projectile comes out of the barrel. Down-range accuracy and retained energy are better with a heavier projectile leaving the barrel at subsonic speed rather than an impractically-lightweight projectile leaving the barrel at a supersonic speed of 1400+ feet per second.

SIG ASP

SEMI-AUTOMATIC AIR RIFLES

From tactical drills to target practice, the CO₂-powered SIG MCX ASP delivers 30 rounds of rapid-firing, authentic SIG MCX® performance and handling for more realistic, economical training and practice – any time, any place. The SIG MPX redefined modern pistol caliber SBRs, and this ASP version does no less for CO₂ rifles. The SIG MPX ASP airgun puts more accurate performance into more accessible practice.

ENGINEERED TO A NEW STANDARD OF PERFORMANCE

PELLETS

ADVANCED PRECISION, PERFECTED.

SIG ASP lead and lead-free pellets have been engineered to optimize performance from target to competition shooting to hunting with exacting blends of material and design features affecting range, stability and velocity. In very general terms, flat-topped pellets make superior target shooting loads; domed designs boast greater aerodynamics for long-range accuracy; pointed tops increase penetration. There's a SIG engineered, high-performance pellet designed to excel in every situation.

CRUX™

WRAITH™

CO₂ CYLINDERS

PREMIUM AIRGUN PERFORMANCE

Precision-built SIG ASP pistols and rifles depend on quality ammunition and fuel to perform up to SIG standards. A higher-quality, cleaner gas in a superior-engineered cylinder can influence the lifetime and performance of any airgun. Over time, a poor cylinder seal can mechanically degrade a critical o-ring. Dirty CO₂ can interfere with valves and seals while diminishing velocities – equating to fewer shots per cylinder. Investing in SIG premium cylinders is a simple way to ensure longer-lasting, SIG precision performance.

- › Standard Neck Air Ports
- › Fit most Airguns designed for use with 12g or 90g CO₂ cartridges
- › Multiple Count Packages
- › Stable Consistent Power Outputs

12g Cylinder

MAGAZINES

PREMIUM AIRGUN PERFORMANCE

Constructed of rugged polymer composite, the ASP Air Rifle magazines are engineered to elevate performance to SIG standards. This patented magazine removes the limitations to firing speed in the SIG MCX® and SIG MPX® ASP. Using a rotary pellet drive system, the SIG RPM™ smoothly feeds 30 rounds per belt – with three refillable belts included – for consistent optimized firing. All of the pistol magazines for the various air pistols are constructed of durable polymer.

THE COMPLETE SYSTEMS PROVIDER™

ASP TARGETS & TRAPS

AIRGUN PRACTICE AND TRAINING TOOLS.

SIG expert training has advanced the skills of many of the world's most elite, tactical shooters. SIG ASP practice tools engage at every level from fundamental skill building to advanced or competitive marksmanship – indoor or outdoor.

Features

SIG EXPERT TRAINING DESIGNS

HEAVY DUTY RUGGED COMPONENTS

ALL-WEATHER DURABLE POWDER COATING

SAFE & SECURE PLACEMENT/MOUNTS

SHOOTING TRAPS

The SIG Pellet Trap delivers ease and enjoyment with its simple setup design. The heavy duty metal framing offers noise recognition and minimal clean-up for endless skill-building and conditioning drills. Traps come with 25ct paper targets and additional paper target refills are available.

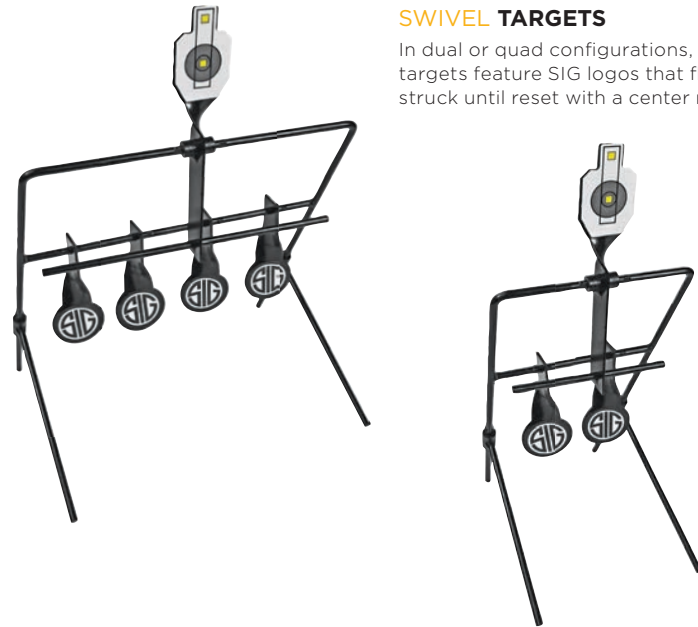

TEXAS STAR TARGETS

Nine center mass targets rotate around a single, central axis using strikes to vary both the gravity-driven speed and direction of the spin for engaging and dynamic practice.

SWIVEL TARGETS

In dual or quad configurations, SWIVEL targets feature SIG logos that flip up when struck until reset with a center mass hit.

SHOOTING GALLERIES

Shooting Galleries have center mass targets that magnetically lock down when struck, while used pellets are collected for easy range cleanup. A central SIG logo knockdown target resets the gallery upon impact.

*Always use appropriate ear and eye protection making sure that the range has a secure and reliable backstop.

*Recommended for use with lead airgun pellet and lead shot only, not for steel BB use. Power limited to 16 Ft Lbs.

SIG SAUER ACADEMY®

No matter what you shoot, we'll make you a better shooter.
Guaranteed.

140 ACRES. 110 COURSES. 100% TRAINING.

From executive protection to active shooter response, from close quarters combat and basic marksmanship to long-range sniper training, the SIG SAUER Academy® has provided the highest quality firearms and tactics training available anywhere in the United States for more than two decades. Located on over 140 acres in Epping, NH—only an hour from Boston, MA—our facility features state-of-the-art indoor and outdoor ranges, tactical training areas, urban environments, shoot houses, a maritime training area, and a force-on-force village. The SIG SAUER Academy offers a comprehensive arsenal of more than 110 courses for the armed professional and responsible citizen. Whatever your firearm training needs, wherever you need training, and whatever you choose to shoot, we have a solution that will exceed your expectations and make you a better shooter, guaranteed.

THE COMPLETE SYSTEMS PROVIDER™

The SIG SAUER Academy® is internationally recognized for the use of superior training techniques and unmatched results. Armed professionals and responsible citizens continuously choose to train at the SIG SAUER Academy for all their firearms, tactical, and related training needs.

WHY TRAIN AT SIG

The SIG SAUER Academy offers the very best self-defense and firearms training available, as well as expert law enforcement training. That's why discriminating individuals and elite government agencies call upon SIG SAUER Academy for their firearms, tactical, and law enforcement training needs. The SIG SAUER Academy is unique; we are not a public shooting range, though more than half of our classes are open to responsible citizens (check the prerequisites or schedule for restrictions). Range use is restricted to scheduled classes, shooting matches, and qualified group leases that meet Academy requirements. Proper credentials are required to take the scheduled classes, and may include either a background check or a current license to carry permit.

THE TEAM

SIG SAUER Academy instructors and support staff have years of experience and are ready to assist you in any way you need during your time at the academy.

FACILITIES

The SIG SAUER Academy offers state of the art indoor and outdoor training facilities. SIG SAUER Academy has continued to develop a variety of ranges and infrastructures including a maritime training area, a tactical training area, multiple shoothouses, the only publicly accessible 1000 yard range in the New England area, and a 360 degree range. Additionally, in 2012 the Academy invested in a brand new home for the SIG SAUER Academy Pro Shop that displays the entire line of SIG SAUER firearms and expanded its coverage of accessories and products with vendors that represent the best of the industry merchandise.

For course descriptions, schedules, and more, visit sigsaueracademy.com

ARMORER CERTIFICATION

The SIG SAUER® factory armorer certification enables the agency armorer or individual user to completely disassemble, inspect, service, and reassemble associated weapons systems without voiding the factory warranty. Proper and routine weapon maintenance and inspection of a firearm are essential to ensure maximum reliability. Factory armorer courses at the SIG SAUER Academy certify agency armorers or individuals to maintain, inspect, service, and repair selected SIG SAUER firearms while preserving the factory warranty. Upon successful completion, armorers will fully understand each firearm and be factory-certified for a period of three years.

SHOOTING DEVELOPMENT

From the first-time shooter to the range veteran, our progressive shooting development courses offer a logical shooting evolution designed to build a complete shooter. Pistol, rifle, and shotgun courses are taught in basic, intermediate, and advanced levels that follow a simple and easily reproducible experience utilizing best practices. Breaking from traditional firearms training concepts, the SIG SAUER Academy uses a unique, simplified method of adult learning behavior to achieve near instant positive results.

INSTRUCTOR DEVELOPMENT

The SIG SAUER Academy takes special care in preparing knowledgeable men and women to become effective firearms instructors for students of all levels. It takes more than subject mastery to be a good instructor. We focus on teaching proven techniques that successfully transfer essential skills and knowledge from instructor to student in less time. Instructor candidates practice teaching techniques acquired with each other and are rigorously evaluated for classroom and range skills mastery.

SPECIALTY TRAINING

Each specialty course has a specific objective outside the scope of standard firearms training. These courses focus on a specialty discipline or scenario and incorporate training methods designed to achieve nothing short of success. Students will be confronted with unfamiliar and uncomfortable situations in order to familiarize themselves with such eventualities and learn to prevail.

PISTOL ACCESSORIES

CLASSIC EXCHANGE KITS

Change calibers, or change equipment. Run the elite warriors' firearm in any situation.

- › Converts P226® and P229® to 9mm, .357 SIG or .40 S&W

- › Includes: Complete Slide, Barrel, Recoil Spring Assembly and Magazine

NEW

P320® EXCHANGE KITS

The modular pistol has arrived. Removing P320's fire control group unlocks hundreds of combinations.

- › Includes: Complete Slide, Barrel, Recoil Spring Assembly, Grip Module and Magazine
- › RX and Suppressor-Height Sights Available
- › Not Compatible with Manual Safety Models

PISTOL MAGAZINES

Original factory magazines designed specifically for SIG SAUER® pistols.

- › Capacities from 6 to 21 Rounds
- › Found in .380 ACP, 9mm, .357 SIG, .40 S&W, 10mm, and .45 ACP

RX SLIDE KITS

ROME0® reflex optic slides for P226, P229 and P320 models.

- › Includes: Complete Slide with Pre-Installed ROME01
- › Only Available in 9mm

NEW

PISTOL BARRELS

Pistol barrels MADE BY SIG.

- › Machined in .380 ACP, 9mm, .357 SIG, .40 S&W, 10mm, .45 AUTO
- › Threaded and Non-Threaded Versions

P320 GRIP MODULES

Engineered to fit your hand and your P320®.

- › Full-Sized, Carry, Compact and Sub-Compact
- › Black, Flat Dark Earth and White
- › Large, Medium and Small (Not Available in All Colors and X-Series)
- › X5 Grip Module Includes Weight and Magazine Funnel

NEW

PISTOL TRIGGER UPGRADES

Introduce the next level in precision to Classic and P320 pistols.

- › Made in Flat and Curved Trigger Shoe Configurations

PISTOL PART KITS

Keep your favorite firearm running like new.

- › Replacement Parts Kits for Classic and P320 Models
- › Factory Approved Parts for Every Need

PISTOL GRIPS

Modify the look and feel of your Classic, Single-Action or 1911.

- › Designed by SIG SAUER®
- › Available in Multitudes of Colors and Configurations

PISTOL BAGS

- › Padded Interior with Internal Zipped Compartment
- › Elastic Magazine Retention Holds up to (5) Pistol Magazines
- › Durable 500D Nylon
- › Available in Black

PISTOL RANGE BAGS

- › Rugged 600D Cordura Material
- › Five External Pockets
- › Detachable Shoulder Strap
- › YKK Zippers
- › Internal Molle Attachments
- › 10" High, 15" Long, 12" Wide

RIFLE ACCESSORIES

SIG MCX® AR UPGRADE KIT

Transform any MIL-SPEC AR lower receiver into an adaptive and modular SIG MCX® Virtus.
